HOMEWORK 1

DUE VIA CANVAS ON THURSDAY 9/10 AT 4:20 PM

Your assignment is as follows:

Using Beautiful Soup, scrape the song lyrics from Genius.com for one of the songs on the candidates playlists.

Note that this does not need to involve any API calls. You can just use the URL and the original methods we employed in our Beautiful Soup exercise.

Extra credit:

Generate the output above, but use an API call (rather than searching the Genius.com website) to locate the URL for the song lyrics.

Submission details:

- You should use Jupyter Notebook for the assignment.
- It should be minimally commented so that all major coding decisions and steps in the process are explained.
- Please make sure your last name is part of the file name of your Notebook.
- Upload your Notebook (the file ending in .ipynb) to Canvas.
